Test Results for Add-Ons from ca-archive

2019-01-09 by rrbd | 2 Comments

Latest change 2019-02-01 16:30 { *pdf creator 0.1.9* | *PDF Download 3.0.0.2.1* | *Ecosia* | *LinkChecker* | *PDF Mage1.0.3* | *heavens-above* | *Save as PDF* | *R-kiosk* }
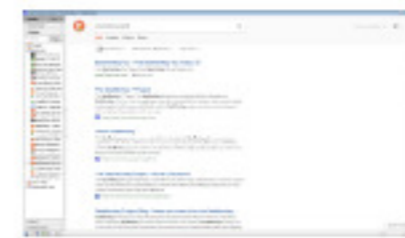

Here I will publish results of (very) short tests of my tests for add-ons from Classic Add-ons Archive with *SeaMonkey*, until we will have found a better place.
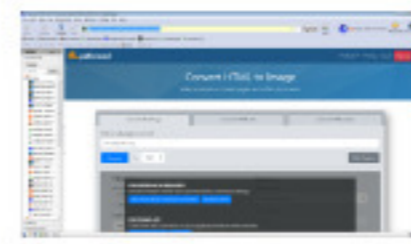

- **Ecosia** 3.4.5 [converted] — The search engine that plants trees! (by Ecosia development team)
  Installation of the converted add-on adds *Ecosia* to Search Sidebar Panel as currently active search engine. The results of a small sample look very similar to *DuckDuckGo*, but I read that the results are from *bing*. The search engine is really useful for me. Here you find some hints on Wikipedia.
- **Link Checker 0.2d.1**-signed.1-signed by ViJo
  currently I do not know whether that very old (2010!) add-on does work or does not.

- I am using *LinkChecker* [converted] version 0.6.7.1 by Kevin Freitas, which works fine. Unfortunately I do not know a source for it, the Web page is dead. May be you want to try download from chip.de?

- **PDF Mage 1.0.3** (No Restart) by PDF Mage
  I did not get it working with my SeaMonkey 2.53, no button to start the PDF creation offered, also not when I tried to add one using context menu 'customize'.

- **pdf creator** 0.1.9
  Installation works fine after conversion, but I can't find out how to use the add-on. I don't find any new context menu entry, button or similar.
- *MeasureIt* 0.4.15 by Kevin Freitas: After conversion add-on installs and works fine with WIN SM2.53 (separate User Profile for tests). Creates a launch icon for the add-on in the *SM Navigation Toolbar*. After click on icon you can mark a rectangle on the screen, dimensions in px will appear. I haven't a clue for what I should need that, but it works.

MeasureIt

- **PDF Download** 3.0.0.2.1-signed.1-signed
  Can not be used any longer with any browser, required infrastructure does no longer exist. pdfdownload.org hat become part of the Nitro Family.

- **R-kiosk** 0.9.0.1-signed.1-signed by Kimmo Heinaaro
  After conversion add-on installs and works fine with WIN SM2.53 (separate User Profile for tests). After relaunch of SeaMonkey the browser will be in "Kiosk Mode", no Menu Bar, no Navigation bar or similar is available. But it is not a perfect Kiosk, Sidebar is still active, so that Bookmarks, search and so on still can be used. May be you should disable Sidebar before relaunch?
  ⚠ R-kiosk only can be disabled after SeaMonkey Browser has been launched in Safe mode.

R-Kiosk

- **Save as PDF** 1.5.1-signed.1-signed by Pdfcrowd Team
  After conversion add-on installs and works fine with WIN SM2.53 (separate User Profile for tests). After relaunch of SeaMonkey the browser will show a *Save as PDF* — Icon at the right end of the navigation Toolbar. Works fine, PDF- results look very similar to source page, contain working hyperlinks, what makes those PDF documents much more useful that the output of printer solutions like FreePDF (my one might be outdated).
  But unfortunately there also are pages where the results of this add-on are completely unusable, for example heavens-above.com/skychart2. Result here!

Save as PDF Screenshot

- WebToPDF **12.11**
  After conversion installation works fine. The add-on adds a new item to context menu for rightclick on web page contents with several sub items. I tested 'Safe as PDF',
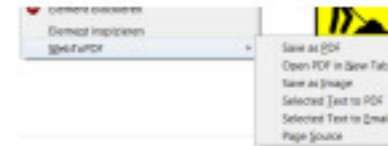

For your own results please leave a comment including a link to a screenshot, I will move your results from Comment to this blogpost.

Element Inspector 0.12 and **Canvas Fingerprint Blocker 0.0.5** work in SeaMonkey after conversion.
